

FULL-STACK PRODUCT DEVELOPMENT

Your idea becomes a product people love to use.

Instead of juggling freelancers, agencies and cloud setups: **one accountable team** for strategy, design, code and AI. In the end, the code belongs to you.

Your delivery plan: from kick-off to a usable MVP in 8-16 weeks, with no handovers between vendors.

VENDOR LOCK-IN: YOUR CODE

What slows teams down today

The idea is ready, but coordinating vendors, cloud setup and AI experiments burns months.

72% of AI projects never make it to production

85% of companies in the DACH region lack in-house AI expertise

What NexPatch takes care of

- Sharpen the idea, define the architecture, set a clear roadmap
- Deliver backend, web app, AI features and data pipelines
- Deployment, security, monitoring and evolution after launch
- From single project to partnership, with funding support on request

01

Discover

business case, users, data, risks

02

Design

UX, architecture, delivery plan

03

Build

full-stack and AI implementation

04

Deploy

cloud, security, observability

05

Iterate

growth, optimisation, handover

A fit for you if

A validated idea but no capacity: startups, innovation teams and growing mid-sized companies.

How we work

One team for product, AI, data and operations. Visible progress every week instead of status slides.

Our track record

Founder DNA from 50+ products: funding portals, networks, analytics and forecasting platforms.

● UP TO 100% PUBLICLY FUNDABLE

● YOU OWN THE CODE

● 8-16 WEEKS TO MVP

● GDPR COMPLIANT

Tell us about your idea.

30 minutes, no strings attached: we assess your plan and show how quickly it can become a usable product.
